

**VISIT DU PONT AT THE
NEW YORK WORLD'S FAIR 1964-1965**

The Fair of all fairs—646 acres of wonder and thrills
... nearly 200 exhibit buildings ... 75 restaurants
featuring many national cuisines ... rides,
stage shows, movies, fireworks ...

... and right in the midst of it all, occupying a
prominent position at the Fountain of the Planets ...

THE DU PONT PAVILION

Of striking carousel design incorporating 48 Du Pont products in its construction and appointments, the Pavilion contains two theaters and a demonstration arena for presenting:

"WONDERFUL WORLD OF CHEMISTRY"

. . . a theatrical production synchronizing actors on stage with actors on film, followed by dramatic chemical demonstrations—the entire 45-minute show spot-lighting significant products of Du Pont research. The performances are scheduled continuously throughout each day, admission free to the millions of persons attending the Fair.

COME TO THE FAIR!
